CLEAN ENERGY DC | A PERKINS EASTMAN DESIGN 2

LETTER FROM MAYOR MURIEL BOWSER

During the period covered by this annual report, through the aid of our city administration we helped District residents and businesses navigate through global pandemics, making sure they were safe and healthy and that our city continued to flourish.

As the world shifts, we were increasingly seeing the results of climate change. Our District's commitment to clean energy did not waver. It is our goal to use that same program of effort to support our community and move our responsibility to some more robust methods.

We all followed a path to low- and middle-income residents to help lower their energy bills. This included providing the efficiency of smart meters, helping to maintain the homes and adding solar power to the homes. In partnership with the Department of Energy and Environment (DEE) and the Department of Transportation (DOT).

We expanded our efforts to provide our residents with more sustainable transportation options. We have created a new set of rules for our city's public transit system, a number of projects for the District Department of Transportation (DDOT).

We gave more residents the ability to get a job opportunity. Through the DC Sustainable Energy (DSE) and the Sun Green Program, we provided all individuals involved in the program to receive a job training and full-time positions for District residents. Secretary, DEE, extended its solar through all housing programs.

Thanks to these efforts and more, our city didn't lose a step in being a clean energy leader in fact, we gained one. The District has become the most clean energy leader in the world since 2019.

We made tremendous efforts to the clean energy transition, even during a challenging time. Now that DC is a clean energy leader, we will continue to work on it. Supporting our residents and business during the recovery, we will advance our clean energy goals, reducing our greenhouse gas emissions, and building a strong green economy. All of these steps will make our community safer, healthier and more resilient.

Sincerely,

 Muriel Bowser
 Mayor, Washington, DC

2020 Progress Report

1. DC Public Schools

MAYOR'S LETTER

Let me start by saying how proud I am of the progress we've made in the last year. We've made significant progress in many areas, including clean energy and climate action. The Clean Energy DC Act is a landmark piece of legislation that will help us meet our climate goals and create jobs. I'm excited to see the progress we've made in the last year and look forward to continuing our work in the coming year.

MAYOR BOYCE WATSON

OUR INAUGURAL PROGRESS REPORT

Since the Clean Energy DC Act passed, we've made significant progress in many areas, including clean energy and climate action. The Clean Energy DC Act is a landmark piece of legislation that will help us meet our climate goals and create jobs. I'm excited to see the progress we've made in the last year and look forward to continuing our work in the coming year.

HOW WE GOT HERE

- 1. Substantial DC-wide public utility and energy goals
- 2. DCSE has been established and is working on many projects
- 3. The DC Act has been passed and published
- 4. The DC Act has been passed and published
- 5. The DC Act has been passed and published

CEDC ACT: From Ideas to Action

LANDMARK CLEAN ENERGY LEGISLATION PASSED

The CEDC Act is a landmark piece of legislation that will help us meet our climate goals and create jobs. I'm excited to see the progress we've made in the last year and look forward to continuing our work in the coming year.

PILLARS OF THE CEDC ACT

- 100% RENEWABLE ELECTRICITY BY 2032**
- A CLEAN ELECTRIC VEHICLE TRANSITION**
- THE NATION'S FIRST BUILDING ENERGY EFFICIENCY STANDARDS (BEEF)**
- CLIMATE-RESILIENT DEVELOPMENT**

HOW WE MEET OUR GOALS

Since the Clean Energy DC Act passed, we've made significant progress in many areas, including clean energy and climate action. The Clean Energy DC Act is a landmark piece of legislation that will help us meet our climate goals and create jobs. I'm excited to see the progress we've made in the last year and look forward to continuing our work in the coming year.

MEETING OUR 2032 GOALS OF REDUCING GREENHOUSE GAS EMISSIONS BY 80%

1. Reducing energy use in buildings	10%
2. Reducing energy use in buildings	20%
3. Shifting to clean energy	33%
4. Growing local solar	3%
5. Electrifying buildings	20%
6. Shifting transportation	10%

THE CHALLENGE AHEAD

In 2020, the United Nations Intergovernmental Panel on Climate Change called for governments worldwide to lead to net-zero emissions by 2050 to avoid the most catastrophic impacts of climate change. The District is taking steps to meet this challenge and is committed to meeting its climate goals.
