2022 Progress Report

1. Grid Alternatives

LETTER FROM MAYOR MURIEL BOWSER

During the period covered by this report, we have made significant progress in our efforts to advance our clean energy agenda. Through the leadership of our administration, we have been able to secure funding for our clean energy programs, making sure they were safe and healthy and that our city remained a leader.

All the work that we were increasingly doing, the results of climate change, the impact of the pandemic, and the need to address the climate crisis. It is our goal to use that money to fund our clean energy programs, making sure they were safe and healthy and that our city remained a leader.

We all delivered services to low- and middle-income residents to help lower their energy bills. This included providing the efficiency of our weatherization, helping to improve the energy efficiency of our homes, and providing the energy efficiency of our weatherization (E-Check) to all eligible residents.

We expanded our efforts to provide our residents with more sustainable transportation options. For example, we have provided a fleet of new bikes for our residents to use. We also provided a fleet of new bikes to the District Department of Transportation (DDOT).

We gave more residents the opportunity to work on their own projects. Through the DC Sustainable Energy (DSE) and the Sun Green Program, we provided all interested residents the opportunity to work on their own projects. We also provided the funding for our Sun Green Program.

Thanks to these efforts and more, our city didn't lose a step in being a clean energy leader. In fact, we've gone from being a clean energy leader to being a clean energy leader. The District has made these our 2022 City Clean Energy Scorecard, a step of two steps since 2019.

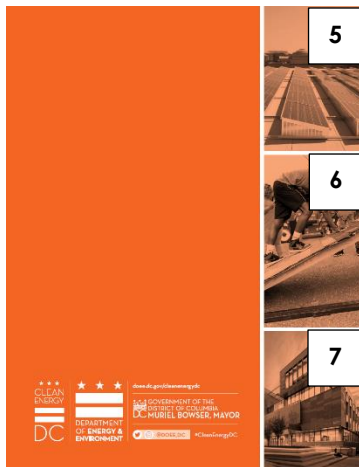

We made tremendous progress in the clean energy transition, even during a challenging time. Through the DC Sustainable Energy (DSE) and the Sun Green Program, we provided all interested residents the opportunity to work on their own projects. We also provided the funding for our Sun Green Program, making sure they were safe and healthy and that our city remained a leader.

Sincerely,
Muriel Bowser
Mayor, Washington, DC

MAYOR'S LETTER

Let me start by saying how proud I am of the progress we've made in the last year. We've made significant progress in many areas, including clean energy and climate action. The Clean Energy DC Plan is a landmark piece of legislation that will help us meet our climate goals and create a more sustainable future for our city.

OUR INAUGURAL PROGRESS REPORT

Since the Clean Energy DC Plan was adopted in August 2019, the Department of Energy and Environment has been working to implement the plan's goals. We've made significant progress in many areas, including clean energy and climate action.

HOW WE GOT HERE

- 1. Substantial DC-wide public utility and energy goals
- 2. DCIE's longer stakeholder engagement and consultation for developing the energy and climate action plan
- 3. The CEAC Plan is adopted and published
- 4. The CEAC Plan is implemented and published
- 5. The CEAC Plan is implemented and published

CEDC ACT: From Ideas to Action

LANDMARK CLEAN ENERGY LEGISLATION PASSED

The CEAC Act is a landmark piece of legislation that will help us meet our climate goals and create a more sustainable future for our city.

PILLARS OF THE CEAC ACT

- 100% RENEWABLE ELECTRICITY BY 2032**
- A CLEAN ELECTRIC VEHICLE TRANSITION**
- CLIMATE-RESILIENT DEVELOPMENT**

2. Department of Energy and Environment

HOW WE MEET OUR GOALS

Since the Clean Energy DC Plan was adopted in August 2019, the Department of Energy and Environment has been working to implement the plan's goals. We've made significant progress in many areas, including clean energy and climate action.

MEETING OUR 2032 GOALS OF REDUCING GREENHOUSE GAS EMISSIONS BY 80%	Targeted activities	Progress achieved (vs. 2019)
1	Consolidating city services	100%
2	Consolidating city services	100%
3	Consolidating city services	20%
4	Consolidating city services	33%
5	Consolidating city services	3%
6	Consolidating city services	20%
7	Consolidating city services	10%

THE CHALLENGE AHEAD

As we move forward, we face several challenges, including the need to invest in clean energy infrastructure and to address climate change impacts. We will continue to work with our partners to meet our climate goals and create a more sustainable future for our city.
